Open to Remote

Education

- **Madan Mohan Malaviya University of Technology, Gorakhpur**

B.Tech in Electrical Engineering;

Courses: Data Structures & Algorithms, Object-Oriented Programming, Digital Systems

Gorakhpur, India

July 2025 – June 2029

Skills Summary

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL, C++, Java, C
- **Frontend:** React.js (v18), Vue 3, HTML5, CSS3, Tailwind CSS, Chart.js, Vite
- **Backend:** Node.js, Express.js, FastAPI, Django 4.2, REST APIs, JWT Auth, Mongoose ODM
- **Databases & Caching:** PostgreSQL, MongoDB, SQLite, Redis, MySQL/MariaDB
- **Data & ML:** pandas, NumPy, scikit-learn, matplotlib, seaborn, OpenCV, MediaPipe, Jupyter
- **DevOps & Tools:** Docker, Git, GitHub, Power BI, Postman, Vercel, Netlify, Linux

Experience

- **Bold Analytics**

Remote

*Data Analyst Intern (under **Yash Kale, Project Manager**)*

1 Apr 2026 - 30 May 2026

Built a full financial intelligence system for Nifty 100 companies — Power BI dashboards, Python ETL pipelines, and a Django REST API running in parallel.

- o Designed a star-schema PostgreSQL data warehouse (ETL from MySQL/MariaDB) covering 12 years of financial data across 7 tables: P&L, balance sheet, cash flow, analysis, pros/cons, documents.
- o Wrote Python ETL scripts (pandas + SQLAlchemy) for extraction, year standardization, sector classification, computed metrics (debt-to-equity, free cash flow, ROA, interest coverage), and idempotent upsert loading.
- o Delivered 7 production-grade Power BI dashboards with DAX measures and Power Query transformations for investor and analyst use — zero SQL knowledge required by end users.
- o Contributed to Capstone Project: All India Villages API — SQL, CRUD API (Node.js), React frontend, and Python data cleaning in a team of 5 using Git and Agile practices.

Projects

- **ByteLink — Full-Stack URL Analytics Platform** (React + FastAPI + Redis + SQLite + Chart.js): Production-deployed URL shortener with Base62 short-link generation, custom vanity URLs, link expiry, and password protection. [\[GitHub\]](#)
 - o Achieved sub-50ms median redirect latency via Redis caching with automatic in-memory fallback; async background geo-tracking with zero impact on redirect time.
 - o Interactive analytics dashboard — real-time click distribution by country, QR code generation, and Redis-based rate limiting for abuse prevention.
- **Hand Gesture Volume Control** (Python, OpenCV, MediaPipe, PyCAW): Real-time hand gesture volume controller tracking thumb tip and index fingertip landmarks via MediaPipe. [\[GitHub\]](#)
 - o Mapped Euclidean distance between fingertips linearly to system audio volume (0–100%) using PyCAW's Windows Core Audio API.
 - o Rendered dynamic visual volume bar overlay on webcam frame; NumPy array operations for smooth CPU-only real-time inference.
- **Typing Speed Test — Real-Time Performance Tracker** (HTML5, CSS3, Vanilla JS): Real-time WPM, accuracy, and error tracker using debounced keyboard listeners with zero UI lag. [\[GitHub\]](#) [\[Live Demo\]](#)
 - o Persisted personal-best scores via localStorage; validated across Chrome, Firefox, and Safari on desktop and mobile.
 - o Fully responsive across 4 breakpoints using CSS Flexbox; scored 95+ on Google Lighthouse Performance and Accessibility.

Honors and Awards

- CodeChef 2-Star (max rating 1535) — solved 300+ problems across DP, graphs, greedy, and binary search — [Profile](#)
- Ranked 6th of 68 teams — IEEE MMMUT Roboverse 2024, Autonomous Robotics & Embedded Systems — October 2025
- Scored 91.5% — National Level E-Quiz 7.0, CBIT Hyderabad (Mathematics)
- Campus Representative — Elite Coders Winter of Code | MMMUT, Gorakhpur | 2025

Volunteer Experience

- **MMMUT RESO (Research & Engineering Society Organization)**

Gorakhpur, India

Executive Member

2025 – Present

- o Volunteered and anchored technical events and hackathons organised by RESO, ensuring smooth coordination and audience engagement.
- o Hosted and moderated workshops and seminars as anchor, presenting technical content to audiences of 200+ students across departments.
- o Assisted in planning and executing flagship events including coding contests, project expos, and tech fests as part of the core executive team.

Certifications

- **Geodata Processing using Python and Machine Learning** | ISRO | [View](#)
- **40 Hours AI Bootcamp** | AI Spark Community | [View](#)

February 2026

October 2025
